The individuals that do not comply will be re-located.

At any one time, nearly 6.9 million people are on probation, in jail, in prison, or on parole in the United States.

Each year, more than 600,000 individuals are released from state and federal prisons. 9 million cycle through local jails. More than two-thirds of prisoners are rearrested within 3 years of their release and half are reincarcerated.

When reentry fails, the costs are high — more crime, more victims, and more pressure on already-strained state and municipal budgets. There is also more family distress and community instability. Roughly 1 in 28 children currently has a parent behind bars. Mass incarceration has been a major driver of poverty. Without mass incarceration, it is estimated that 5 million fewer Americans would have been poor between 1980 and 2014. <https://aspe.hhs.gov/incarceration-reentry>.

**Six Million Individuals Spending Together
@ \$1,000 per month = Six Billion Dollars per month
Equals \$72 Billion Per Year**

That's why the system want's us together in-jail. We are spending together for them. They are getting that \$72 billion dollars, plus what the families are spending. This does not include the attorney and court fees etc.

NOW.. Through the PC Platforms, spending together we can bring 20% of the \$72 Billion Dollars back into our communities and families.

Interesting how the only time our government can bring us together is to incarcerate us in prison, housing projects and low-wage factories, hotels and kitchens.
